

SYSTEM
DMA12HOS21115S1 & DMA12HIW21115S1

The DMA12HIW21115S1 comes with factory connection line set sizes of 1/4 liquid and 1/2 vapor.

The manufacturer - {Midea} approves the following exception to the requirement for the 1/2 inch vapor line providing that all conditions are met:

Vapor line for the DMA12HIW21115S1 can be reduced to 3/8 inch if the following conditions are met:

1. Line set length total does not exceed 82 feet
2. Max. difference in level of 33 feet
3. Line size adaptation may be accomplished by using one of these two options:
 - a. (1x) 40R86 flare adapter 1/2 @ 3/8
 - or
 - b. (1x) 3586 coupling 1/2 FFL @ 3/8 MFL + (1x) B28 (gasket)

Note 1: Use of this exception nullifies the ability to use the 100 ft line set exception.

Note 2: While it is always recommended to follow the guidelines outlined by the manufacturer, it is understood that some installations may require an exception to line set sizes. An exception to the guidelines should only be used when required and is not an applicable exception to the whole model series. In this specific case, it applies only to the model listed in the bulletin.
